Measuring waves with GPS

The DWR-G wave buoy measures waves with help of the Global Positioning System (GPS) only. It features a patented algorithm and custom-made GPS receiver. With a single stand-alone GPS receiver it can measure directional waves, up to 100 s periods, without any calibration ever, and even in the middle of the ocean.

Already with its introduction in 2002 the new GPS measurement principle was tested against the standard in the field of wave measurement: the Datawell Directional Waverider (MkII). For a copy of these publications please visit our website or contact Sales. By now the GPS buoy is well-established and has taken its own place in the oceanographic market.

The highlights:

- Measuring wave height and wave direction.
- Wave periods up to 100 s.
- HF link up to 50 km over sea. By powering up the transmitter and using a directional receiving antenna the HF range can be stretched.
- LED flashlight mounted at the top of the antenna increasing the buoy’s visibility to passing ships.
- The GPS receiver for the wave measurement also serves for buoy positioning, thus facilitating buoy retrieval.
- A water temperature sensor in the mooring eye providing sea surface temperature. (0.7m and 0.9m version only)
- Standard integrated datalogger based on the latest flash card technology.
- High capacity primary cells operating under all wave conditions and weather circumstances for up to one-and-a-half years without replacement.
- Intelligent Test Box enables the sequential discharge of individual battery strings
- An accurate onboard energy meter monitors the actual energy consumption of the buoy, and reports a reliable estimate of the remaining operating life.
- Available in 0.9 m, 0.7 m and even 0.4 m diameter hulls. See also our separate DWR-G 0.4 m diameter brochure.

Optionals:

- HF link: 25.5 MHz - 35.5 MHz
- Iridium: global, two-way satellite link
- Iridium SBD: global, two-way satellite link
- Argos: global, one-way satellite link.
- GSM: near shore data link via SMS or Internet
- Power switch: on/off
- Hull painting: yellow (no anti-fouling)
# Directional Waverider GPS

**Datawell - Oceanographic Instruments**

## Specifications

### Wave motion sensor
- **Sensor**: single GPS (not differential)
- **Precision**:
  - 1-2 cm: free floating, all directions (1σ)
  - 1-2 cm + 0.5 %: moored, vertical (1σ)
  - moored, horizontal, depends on current and wave frequency (excluding GPS antenna pitch and roll motion)
- **Periods**: 1.6 s - 100 s
- **Calibration**: not required ever
- **Exclusion**:
  - GPS signals do not penetrate through water, occasional data gaps may occur
  - not resistant to SA (Selective Availability, may be switched on by US Department of Defence for strategic reasons)
  - measurements fail at position changes > 100 m in < 100 s, e.g. when used free floating or towed at constant velocities > 1 m/s

### Wave data
- **Data**: north, west, vertical
- **Resolution**: 1 cm (north 2 cm, LSB “north” is GPS data gap indicator)
- **Range**: –20 m - +20 m
- **Rate**: 1.28 Hz
- **Reference**: WGS84

### Spectral data
- **Frequency resolution**: 0.005 Hz below 0.10 Hz and 0.010 Hz above
- **Frequency range**: 0.025 Hz - 0.60 Hz
- **Direction resolution**: 1.5º
- **Direction range**: 0º - 360º

### Standard features
- **Datalogger**: Compact Flash Module 1Gb
- **LED Flashlight**: 4 high intensity LEDs, colour yellow (590 nm), pattern 5 flashes every 20 s standard length 35 cm
- **GPS position**: every 30 min, precision 5 m
- **Intelligent Test Box**: enables the sequential discharge of individual battery strings
- **Water temperature**: range –5 ºC - +46 ºC, resolution 0.05 ºC, accuracy 0.2 ºC

### Options
- **HF transmitter**: frequency range 25.5 MHz - 35.5 MHz (35.5 - 45.0 MHz on request) transmission range 50 Km
- **Flashlight antenna 195 cm**:
- **Argos/Iridium**: satellite communication
- **GSM**: mobile communication
- **Power switch**: data files are closed and secured
- **Hull painting**: Brantho Korrux “3 in 1” paint system (no anti-fouling)

### General
- **Hull diameter**: 0.7 m or 0.9 m (excluding fender)
- **Material**: stainless steel (AISI316) or Cunifer 10
- **Weight**: approx. 96 Kg (0.9m 211 Kg)
- **Batteries**: 0.7 m diam. operational life 12.5 months, 2 sections of 16 batteries 0.9 m diam. operational life 25.5 months, 5 sections of 13 batteries type Datacell RC25G (250 Wh green)
- **Receiver**: RX-C, RX-D
- **Compatibility**: DWR-G hatchcovers are compatible with MkII buoys
